0202

25X1

25X1

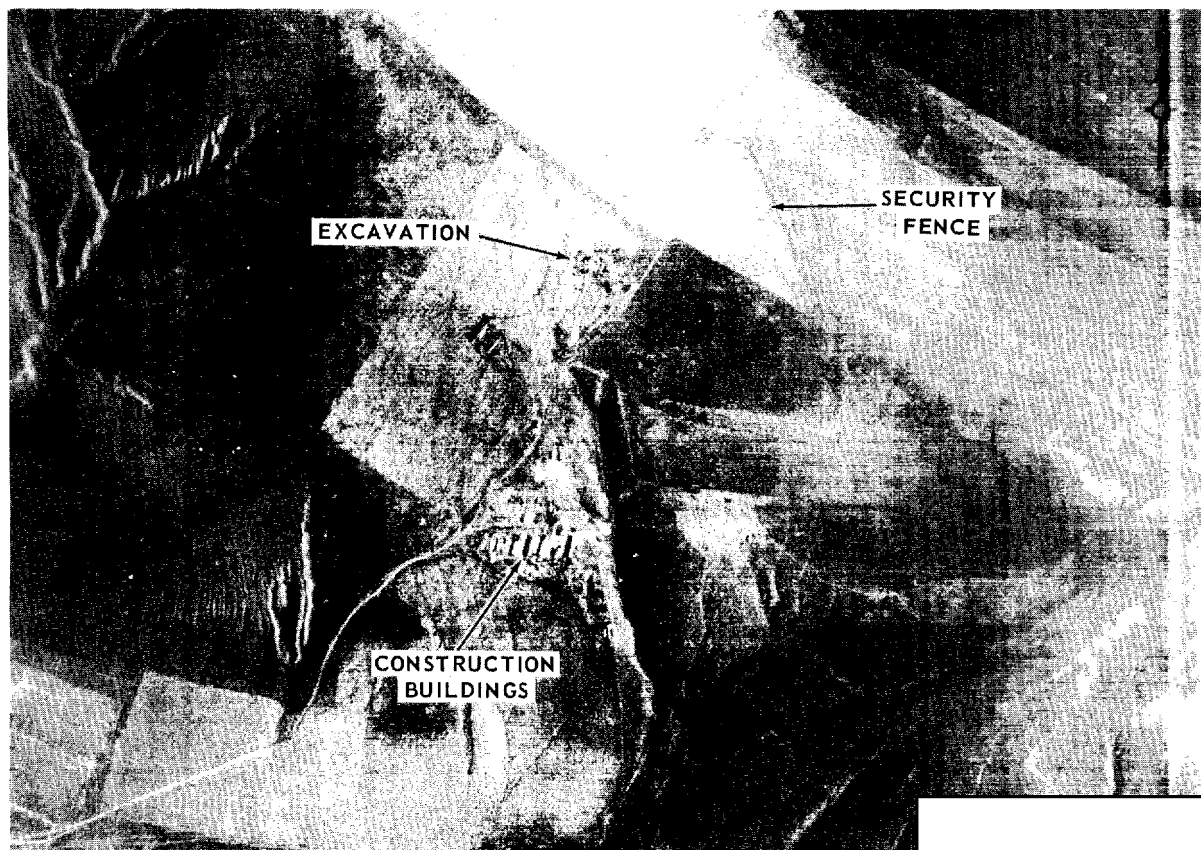

Location: Approximately 24 nm NNE of the complex support facility

Type: IIID

25X1

Stage of Construction: Early

The secured probable launch site is situated in rolling farmland and consists of an excavation with a silo coring. The security fence encloses an area large enough to contain an L-shaped electronic facility. This fact and the presence of 5 construction buildings (SSW of the site) indicate the site is a probable control site.
